SKILLS

- Leadership & Strategy

- Delivery & Process Excellence

- Sales & Solutions engineering

PROFESSIONAL SUMMARY

Accomplished Global Delivery Leader with over 20 years of experience orchestrating large-scale SaaS, digital, and enterprise delivery programs across diverse geographies. Proven ability to drive measurable business outcomes through delivery excellence, enhancing revenue realization, PO-to-billing conversion, customer satisfaction (CSAT), drop protection, and execution predictability.

Renowned for constructing predictable and scalable delivery engines by fostering strong governance, disciplined execution, and seamless cross-functional alignment with sales, engineering, product, finance, support and customer success teams.

Adept at managing complex multi-vendor environments and stabilizing operations in high-growth, high-pressure settings by employing the PRISM delivery model (Predictability, Results, Intelligence, Scale, Metrics) and leveraging AI to enhance visibility, enable early risk identification, and fortify decision support while maintaining rigorous execution standards.

AI LEADERSHIP & TRANSFORMATION HIGHLIGHTS

- Designed and Implemented AI enabled delivery governance models to improve predictability and executive visibility
- Leveraged data driven insights from onboarding tool to project program progress, highlight region wise health scorecards and revenue conversion
- Worked with internal stakeholders across product, engineering, support and success teams to drive AI adoption resulting in improved collaboration, confidence and overall delivery quality
- Leveraged low touch automation approach to eliminate friction during integration stages and improve client stickiness
